1. Fund Distribution Breakdown (Total 100%)

Every investment is split into 8 streams — distributed automatically by smart contract, 100% on-chain.

#	Income Type	%	Description
1	Refer Commission	5%	Paid directly to the referring member
2	Update Commission	50%	Distributed via 60-Generation Dynamic Matrix
3	Token Income	20%	ARF Tokens per dollar of update cost
4	Creator Income	5%	Reserved for project development & maintenance
5	Generation Income	5%	Distributed across 30 upline generations
6	Rank ROI	10%	For qualifying members — Level 1 to Level 17
7	NFT ROI	1%	Distributed daily to active NFT holders
8	Reward	4%	Dedicated to Rank Achievers (Level 10–17)
	TOTAL	100%	Fully distributed — zero hidden fees

2. 60-Generation Dynamic Matrix (50% Update Commission)

A unique level-based matrix where the system finds the correct upline based on the member's level number.

Logic	When a member updates to Level N, the N-th upline receives the 50% Update Commission.
Qualification	To receive the Level N commission, the upline must already be at Level N or higher.
Dynamic Pass-up	If the N-th upline is not qualified, the system skips them and searches N steps further up.
Max Range	The upward search continues for up to 60 Generations before stopping.

3A. ARF Token Reward — Doubling Logic

Every level upgrade grants ARF Tokens. The amount doubles at each step, creating exponential growth.
